

## What is Lets Golf?

A new addition to Lets Race (opening in 2016) is the amazing Lets Golf product, featuring 3 HD Golf simulators. Each simulator has been created by the best in the business at HD Golf, with some of the world's best golfers using their equipment. Their simulators not only allow you to play a round rain or shine, light or dark, they provide a unique level of analysis and feedback, unavailable at your average golf club. Take your typical driving range session to the next level or play a full round at a bargain price, either way, you will be amazed.

Lets Golf provides a warm and comfortable environment, including secluded golf sim rooms for privacy during your game, that will make the winter months away from the course more bearable.

## Why Lets Golf rather than an actual golf course?

Lets Golf brings together a stunning venue and the world leading HD Golf Simulators to create a unique activity that suits all levels of golfer.

Their comfortable and private golf booths are a completely different environment to being out on a real world course, but one that comes with its own advantages whilst still allowing you to play your natural game.

Each booth comes with a touch screen control system, allowing you to choose your course and hole, while providing additional software that allows for analytical data about various segments of your game. Play on real world, world famous golf courses, without having the travel or high price tag.

Beat the elements and play all year-round, any time of the day, 7 days a week. It's cheaper than any local golf club and analytical computer data and tracking technology allows you to improve your game with specialist equipment not available on your average round of golf.

**Website:** <http://www.lets-golf.co.uk>

**Images:** High res images can be downloaded from: <https://spaces.hightail.com/space/TloXF>

- 4-5 players - £29.99
- 6 players - £34.99

**Suitability:** Suitable for players of all ages and abilities. Children's programmes available on request.

## WHAT DOES LETS GOLF HAVE TO OFFER

### **Simulators**

The HD golf simulators provide solutions for some of the best golfers in the world in both residential and professional environments. Utilising HD projector technology and equipment and high end ball

tracking hardware, each of Lets Golf's three simulators can track launch angle, ball & club speed, club face angle and swing path measurement.

Each simulator is housed in its own booth for your privacy, giving you confidence with your game and some time with just you and your playing partners to chat the afternoon away over a game of golf. Control your session using a 19" touch screen, whilst taking shots from the HD soft strike tee matt and nylon turf and hearing everything from each course with full surround sound.
